## Pandoc Text Converter

## Overview

Pandoc is a command line tool for interconverting between markup languages. Pandoc supports common languages like HTML, Markdown, and LaTeX, common document formats like docx and epub, and lots of weird stuff I've never heard of before.

$$R_{\mu\nu} - \frac{1}{2}g_{\mu\nu} R + g_{\mu\nu}\Lambda = \frac{8\pi G}{c^4}T_{\mu\nu}$$

For example, Pandoc can convert Markdown with inline LATEX into a PDF:

pandoc pandoc.md -f markdown -t latex -s -o pandoc.pdf

You can generate an intermediate .tex file, customize it, then convert it to a PDF in a separate step:

pandoc pandoc.md -f markdown -t latex -s -o pandoc.tex pdflatex pandoc.tex
